About Us.

Monarch Techno Engineering Solutions (MTES) is a specialized engineering consulting services delivering reliable, precise, and high-quality industrial solutions. With strong expertise across Oil & Gas (Offshore, Onshore), Petrochemicals, Pharmaceuticals and Process industries, MTES focuses on engineering design, project support and technical consulting that drive operational excellence. Built on a foundation of accuracy, integrity and innovation, MTES provides end-to-end engineering support that helps clients enhance efficiency, reduce project risks, and achieve sustainable performance. Our commitment to quality and technical excellence makes us a trusted partner for complex and mission-critical engineering requirements.

VISION

- To be a trusted global engineering partner delivering innovative, safe and sustainable solutions that empower industries to operate smarter, faster and more efficiently.

MISSION

- To deliver reliable, high-quality engineering solutions that enhance safety, efficiency, and performance across industrial projects.

Our Area of Experties

01**OIL & GAS**

Engineering support for upstream, midstream, and downstream facilities with a focus on safety and efficiency.

02**PETROCHEMICAL**

Reliable engineering for process units and plant systems, enhancing performance and operational stability.

03**PHARMACEUTICAL**

Compliant engineering solutions for utilities and clean environments ensuring precision and safety.

04**STORAGE TERMINAL**

Design and engineering for storage tanks and terminals with strong emphasis on safety and durability.

05**AIR SEPARATION**

Expertise in oxygen, nitrogen, and argon plant engineering with optimized and reliable designs.

06**POWER**

Engineering solutions for power generation and distribution aimed at improving reliability and performance.

Multi-Disciplinary Engineering Capabilities

PROCESS

MTES provides efficient process engineering solutions that optimize plant performance and safety.

We focus on robust design, simulation, and improvement of complex industrial processes.

INSTRUMENTATION

We deliver precise instrumentation design and control solutions for safe and reliable plant operations.

Our expertise ensures accurate measurement, monitoring, and process automation.

STRUCTURAL

We design strong, compliant, and durable structures for industrial facilities and equipment support.

Our structural engineering ensures stability, safety, and long-term reliability.

PIPING

MTES offers detailed piping design and routing solutions for smooth and efficient fluid transport.

Our layouts enhance operability, maintainability, and system integrity.

PIPELINE

We specialize in pipeline engineering for safe, reliable, and cost-effective product transportation.

Our expertise covers routing, stress analysis, and compliance with global standards.

ELECTRICAL

MTES delivers electrical engineering solutions that improve plant safety, continuity, and power reliability.

We design optimized electrical systems for industrial and high-load applications.

MECHANICAL

We provide mechanical engineering solutions for rotating, static, and packaged equipment.

Our designs ensure high performance, durability, and seamless plant integration.

DIGITIZATION

We support industrial digital transformation through smart tools, modeling, and data-driven engineering.

Our digital solutions enhance accuracy, efficiency, and decision-making.

PROJECT MANAGEMENT

MTES offers end-to-end project management ensuring on-time, quality-driven, and cost-efficient delivery.

We coordinate disciplines, resources, and schedules for smooth project execution.

THANK YOU

Thank you for choosing to explore MTES.
Your trust inspires us to deliver engineering solutions that drive
safety, reliability, and performance.

Address

Monarch Techno Engineering Solutions Pvt. Ltd.
Office No. 502, NMS Titanium, Sector -15,
CBD Belapur - 400614, Navi Mumbai.
